

D8T: WHY REBUILD?

5 REASONS TO CHOOSE A CPT OR CPT+ REBUILD

Restoring your powertrain's original performance and productivity improves machine availability and greatly extends service life. A Cat[®] Certified Powertrain Rebuild with Butler returns your radiator, engine, transmission, torque converter, final drive and axle to like-new condition, helping you get maximum return on your original machine investment

Get the most economic value out of your original equipment investment

1

Keep your preferred equipment while restoring its original performance and productivity levels

2

Benefit from product enhancements introduced after your equipment was first manufactured

3

Choose to upgrade optional features and technologies to current standards, which is a great way to reduce costs, boost productivity and enhance efficiency at a much lower price than buying new

4

Get same-as-new support and services from your dealer and financing options through Cat Financial
